

## **DOCK SIGNS—911 Addresses on the Water**

**URGENT:** Here's how you can help save a life on Lake Anna . .

LACA has two safety initiatives that are designed to help law enforcement and emergency services locate boaters who are in trouble on Lake Anna:

1. Lake Anna 911 location maps
2. Yellow signs with black lettering on waterfront docks, common areas and Dominion Energy's islands

Since Dock Signs were first introduced in 2012, over 500 dock & island signs have been installed by your neighbors and Dominion. These serve as water addresses so that, in the event of an emergency, boaters can give 911 operators the information on the signs.

The application process creates a link between your dock sign or common area and your 911 street address. This information has become part of the data base that 911 call centers in Louisa and Spotsylvania use to pinpoint exact locations on the lake reducing emergency response time.

Please help First Responders help you. Apply for a dock or common area

sign(s) today.
